The appended comparative statement shows that there was a net decrease in consumption of 71 & 99 gals = 9½ prs, during the quarter under review. This is reported to be due chiefly to the very high prices of food grains current during the quarter, and also to the failure of coffee crops and the prevarence of cholera of a severe type in the Kadur and Shimoga districts during the month of September.

The accompanying abstract prepared in this office shows that there was a net decrease in the consumption of Arrack to the extent of 198.6 gallons during the six months under review. This is reported to

Re Etc.

(1) to the high prices of foodgrains
